

Conference tables

When your table needs consist of conferencing, training, hospitality, or simple breakroom tables, Chromcraft has the table to fill your needs. The stylish bullnose edge series tables compliment

any conference room with its high pressure plastic laminate overlay top and matching bases. Chromcraft's self edge tables are tremendous values that are sure to please with their high

pressure tops and rims. Our T-mold edge tables offer a greater value for the investment on tables that consist of high pressure plastic laminate tops and durable T-mold edges. Choose from twenty-four

standard laminates or specify your laminate for a small upcharge. For those times when tables are reconfigured for training purposes please see our Task brochure.

Conference tables

Elegant, durable and affordable all describe the T-mold conference and hospitality tables from Chromcraft. T-mold edge

bands provide durable edges that resist impacts and abrasions. Bases in chrome or painted finishes accent the various

table styles. The hospitality bases are available in standard height or pub height to accommodate a broad range of uses.

Chromcraft's conference tables are all backed by a ten year warranty.

Conference tables

Sophisticated, clean appearance, describe the self edge conference and hospitality tables from Chromcraft. Self edge

tables provide matching laminate edges to the top surfaces for clean streamlined appearance. Bases in chrome

or painted finishes accent the various table styles. The hospitality bases are available in standard height or pub

height to accommodate a broad range of uses. Chromcraft's conference tables are all backed by our ten year warranty.

The CP conference power package is available on all tables as an option. There are two power outlet modules with an open/closure door that

conceals two power outlets and two voice/data capable openings. The power package must be specified with your table order and can be spec-

ified on any racetrack, rectangular or hour glass shape table. Tables must be factory modified to accept the CP package.

593 bases (pair) are designed to work with all hour glass and racetrack shape tops.

Conference tables

T-Mold Tops

Multi column base can be used with T-mold, self edge and wood bullnose round tops.

Single column with five prong base for use with round and square tops up to 48" in diameter. This style is also available as a pub height version for tops up to 42" Model 572 in chrome or black finish.

Twin columns are formed using the steel uprights on each base unit. The bases then are fitted with a perforated steel panel to match the metal uprights. The base can be used with all racetrack and hour glass shaped T-mold or self edge tops.

Bullnose Tops

Simple ladder style base is designed for use with all racetrack and hour glass shape T-mold or self edge tops.

Multi column base for use with round tops over 46" up to 60" in circumference. The bun foot design matches wood bullnose edge tops or is painted black to match frame on pattern laminates.

Twin columns are formed using the steel uprights on each base unit. The bases then are fitted with a laminated panel to match the top surfaces. Can be used with all racetrack and hour glass shaped T-mold or self edge tops.

Self Edge Tops

Double column base is designed for use with R492 a 42x72" racetrack top only. Black only column and base.

Single column base with laminated floor disc designed for use with T-mold and self edge round or square tops up to 48". This style is also available as a pub height version for tops up to 42" Model 322-77. Black only column and base.

Double column base with laminated floor disc designed for use with T-mold and self edge racetrack or hour glass shaped tops up to ten foot in length. Black only column and base.
