

## Guardisman series

Chromcraft has over thirty years of experience as a trusted American manufacturer of public seating. Guardsman Series has become synonymous with public seating applications nationwide. Applications ranging from airline hold rooms, hospitals, universities, courthouses, just about anywhere public seating is required. Chromcraft stands behind the Guardsman series against structural

failure with a lifetime warranty. **Guardisman II** units are available without vertical heat seal channels which are embossed into the seats and backs. The non-heat seal version is ideal for public seating in hospitals and medical facilities. Chromcraft's Regal vinyl pattern provides superior upholstery material for Guardsman. Regal can be bleach cleaned with the proper mixture and it is anti-microbial,

and anti-stain resistant.

**Separate Seats and Backs** Easy to maintain units are field replaceable in the event of vandalism or abusive end-users. Opening between seat and back allows for easier cleaning.

**Units Are Available With or Without Arms** For more flexibility arms can be added to units existing in the field or deleted as necessary.

**Metal to Metal Connectors** What does this mean? It means superior strength and rigidity. There is no danger of wood screws stripping out of plywood with Guardsman units. Metal to metal fasteners are used throughout the product to provide the highest quality in public seating.

**Fire Retardant Foam Cushion** Two and one half inches of thick resilient molded Ultrafoam™ a Chromcraft exclusive provides long lasting comfort under intense use and Ultrafoam™ meets all CAL 117 fire retardant requirements.

**L-79 Back to Back** ganging attachments allow the product to be placed back to back without touching or causing damage to the back of the units.
