

Pyramid series

Quality and attention to detail is distinctively displayed in Chromcraft's Pyramid Series. Pyramid is a true multipurpose chair. Features include

generously proportioned seats and backs. Pyramid frames are constructed of 13 gauge true oval tubing for strength and stability. Arms are made

of textured urethane over steel for superior strength. Backs feature comfortable angles and lumbar support. Ergonomic design pro-

vides excellent support while providing long lasting comfort. Pyramid is available in closed and open backs with a wide range of style fabrics.

Pyramid series

Pyramid is available with two options, a straight leg version or a wall saver version. The wall saver option is a great solution for areas where

the chairs may be placed against the wall. Pyramid with the unique wall saver frame sets the back of the chair off the wall by an inch, which protects

both the wall and the chair from unwanted marks or scuffs.

- Arrange the Pyramid Series to fit any space or to suit your own personal taste with a combination of arm, armless and left or right arm combinations along with connecting tables.

- Constructed of unique oval tubing with welded horizontal and lateral supports for ultimate strength and stability. Pyramid arm chairs are topped off with a durable urethane over steel arm for years of lasting service.

Pyramid tables are of one and one-fourth inch thick high

- pressure laminated tops with durable T-mold edges and they are available in all Chromcraft standard laminate colors.
